

Preppy — Daily Mock 001 — 26 September 2026

#TEST

DATE: 2026-09-26

TITLE: Daily Mock 001

#SECTION: QUANT

DURATION: 12

MARKS: 1

NEGATIVE: 0.25

Q1. A train 150 m long crosses a pole in 15 seconds. Find its speed.

- A) 30 km/h
- B) 36 km/h
- C) 40 km/h
- D) 45 km/h
- E) None of these

ANS: B

SOL: Speed = $150/15 = 10$ m/s = $10 \times 18/5 = 36$ km/h.

TAG: Speed-Time-Distance

DIFF: Easy

Q2. The simple interest on a sum of Rs 12,000 at 8% per annum for 3 years is:

- A) Rs 2,660
- B) Rs 2,880
- C) Rs 3,120
- D) Rs 2,400
- E) None of these

ANS: B

SOL: SI = $(12000 \times 8 \times 3)/100 = \text{Rs } 2,880$.

TAG: Simple-Interest

DIFF: Easy

Q3. A shopkeeper marks an article 40% above cost price and allows a discount of 25%. His profit percentage is:

- A) 4%
- B) 5%
- C) 6%
- D) 10%
- E) None of these

ANS: B

SOL: Let CP = 100. MP = 140. SP = $140 \times 0.75 = 105$. Profit = 5%.

TAG: Profit-Loss

DIFF: Medium

Q4. Two pipes A and B can fill a tank in 12 minutes and 18 minutes respectively. If both are opened together, the tank fills in:

- A) $7 \frac{1}{5}$ minutes
- B) $7 \frac{1}{2}$ minutes
- C) 8 minutes
- D) $6 \frac{3}{4}$ minutes
- E) None of these

ANS: A

SOL: $1/12 + 1/18 = 5/36$. Time = $36/5 = 7.2 = 7 \frac{1}{5}$ minutes.

TAG: Pipes-Cisterns

DIFF: Medium

Q5. The average of five consecutive even numbers is 36. The largest of these numbers is:

- A) 38
- B) 40
- C) 42
- D) 44
- E) None of these

ANS: B

SOL: For five consecutive even numbers the average is the middle term, so the numbers are 32, 34, 36, 38, 40.

TAG: Averages

DIFF: Easy

#DIRECTIONS: Q6-Q10

Study the following table carefully and answer the questions that follow.

The table shows the number of students (in hundreds) who enrolled in four courses at an institute over three years.

Year	Java	Python	DBMS	Networking
2023	12	18	9	6
2024	15	24	12	9
2025	18	30	15	12

#ENDDIRECTIONS

Q6. The total number of students who enrolled in Python across all three years is:

- A) 6,600
- B) 7,200
- C) 7,800
- D) 8,400
- E) None of these

ANS: B

SOL: $(18 + 24 + 30)$ hundred = 72 hundred = 7,200 students.

TAG: Data-Interpretation

DIFF: Easy

Q7. The percentage increase in DBMS enrolment from 2023 to 2025 is:

- A) 50%
- B) 60%
- C) $66 \frac{2}{3}\%$
- D) 75%
- E) None of these

ANS: C

SOL: $(15 - 9)/9 \times 100 = 66 \frac{2}{3}\%$.

TAG: Data-Interpretation

DIFF: Medium

Q8. In 2024, students enrolled in Java and Networking together form what percent of the total enrolment that year?

- A) 35%
- B) 40%
- C) 45%
- D) 50%
- E) None of these

ANS: B

SOL: Total 2024 = $15 + 24 + 12 + 9 = 60$. Java + Networking = $15 + 9 = 24$. $24/60 \times 100 = 40\%$.

TAG: Data-Interpretation

DIFF: Medium

Q9. The ratio of total Networking enrolment to total Java enrolment over the three years is:

- A) 2:3
- B) 3:5
- C) 5:9
- D) 4:7
- E) None of these

ANS: B

SOL: Networking = $6 + 9 + 12 = 27$. Java = $12 + 15 + 18 = 45$. Ratio = $27:45 = 3:5$.

TAG: Data-Interpretation

DIFF: Medium

Q10. The average annual enrolment in Java over the three years is:

- A) 1,200
- B) 1,500
- C) 1,800
- D) 2,100
- E) None of these

ANS: B

SOL: $(12 + 15 + 18)/3 = 15$ hundred = 1,500 students.

TAG: Data-Interpretation

DIFF: Easy

Q11. What should come in place of the question mark? $48 \times 12 / 8 + 15 = ?$

- A) 79
- B) 83
- C) 87
- D) 91
- E) None of these

ANS: C

SOL: $48 \times 12 = 576$. $576/8 = 72$. $72 + 15 = 87$.

TAG: Simplification

DIFF: Easy

Q12. Find the missing term in the series: 3, 7, 16, 35, 74, ?

- A) 148
- B) 151
- C) 153
- D) 157
- E) None of these

ANS: C

SOL: Each term is the previous term $\times 2$ plus an increasing counter: $3 \times 2 + 1 = 7$, $7 \times 2 + 2 = 16$, $16 \times 2 + 3 = 35$, $35 \times 2 + 4 = 74$, $74 \times 2 + 5 = 153$.

TAG: Number-Series

DIFF: Hard

Q13. A sum of money doubles itself in 8 years at simple interest. In how many years will it become four times itself?

- A) 16 years
- B) 20 years
- C) 24 years
- D) 32 years
- E) None of these

ANS: C

SOL: Interest equal to the principal accrues in 8 years. Four times requires interest of 3P, so $3 \times 8 = 24$ years.

TAG: Simple-Interest

DIFF: Medium

Q14. The ratio of the present ages of A and B is 5:7. After 6 years the ratio becomes 3:4. A's present age is:

- A) 25 years
- B) 28 years
- C) 30 years
- D) 35 years
- E) None of these

ANS: C

SOL: $(5x+6)/(7x+6) = 3/4$ gives $20x + 24 = 21x + 18$, so $x = 6$ and $A = 30$ years.

TAG: Ages

DIFF: Medium

Q15. A boat covers 24 km downstream in 2 hours and returns in 3 hours. The speed of the stream is:

- A) 1 km/h
- B) 2 km/h
- C) 2.5 km/h
- D) 4 km/h
- E) None of these

ANS: B

SOL: Downstream = 12 km/h, upstream = 8 km/h. Stream = $(12 - 8)/2 = 2$ km/h.

TAG: Boats-Streams

DIFF: Medium

#SECTION: REASONING

DURATION: 12

Q16. In a certain code, TABLE is written as UBCMF. How is CHAIR written in that code?

- A) DIBJS
- B) DJBJS
- C) DIBKS

D) BGZHQ

E) None of these

ANS: A

SOL: Each letter moves one step forward, so CHAIR becomes DIBJS.

TAG: Coding-Decoding

DIFF: Easy

Q17. A is the brother of B, B is the sister of C, and C is the father of D. How is A related to D?

A) Brother

B) Uncle

C) Father

D) Cousin

E) Cannot be determined

ANS: B

SOL: A and C are siblings, and C is D's father, so A is D's uncle.

TAG: Blood-Relations

DIFF: Easy

Q18. Pointing to a man, a woman said, "His mother is the only daughter of my mother." How is the woman related to the man?

A) Sister

B) Mother

C) Aunt

D) Grandmother

E) None of these

ANS: B

SOL: The only daughter of the woman's mother is the woman herself, so she is the man's mother.

TAG: Blood-Relations

DIFF: Medium

Q19. A man walks 5 km north, turns right and walks 3 km, then turns right and walks 5 km. How far is he from the starting point?

A) 3 km

B) 5 km

C) 8 km

D) 13 km

E) None of these

ANS: A

SOL: He ends 3 km due east of his start, since the two 5 km legs cancel.

TAG: Direction-Sense

DIFF: Easy

Q20. Statements: All pens are books. Some books are red. Conclusions: I. Some pens are red. II. Some books are pens.

A) Only conclusion I follows

B) Only conclusion II follows

C) Both conclusions follow

D) Neither conclusion follows

E) Either I or II follows

ANS: B

SOL: All pens being books guarantees that some books are pens. Nothing links pens to red.

TAG: Syllogism

DIFF: Medium

#DIRECTIONS: Q21-Q25

Study the following information carefully and answer the questions that follow.

Seven friends - P, Q, R, S, T, U and V - sit in a straight row facing north.

R sits third from the left end.

Q sits immediately to the right of R.

T sits second to the right of Q.

P sits at the extreme right end.

S sits immediately to the left of R.

U does not sit at either extreme end.

#ENDDIRECTIONS

Q21. Who sits at the extreme left end of the row?

- A) V
- B) S
- C) U
- D) T
- E) P

ANS: A

SOL: The final arrangement from left to right is V, S, R, Q, U, T, P.

TAG: Seating-Arrangement

DIFF: Medium

Q22. How many people sit between S and T?

- A) Two
- B) Three
- C) Four
- D) Five
- E) None

ANS: B

SOL: S is second and T is sixth, so R, Q and U sit between them.

TAG: Seating-Arrangement

DIFF: Medium

Q23. Who sits immediately to the left of P?

- A) U
- B) Q
- C) T
- D) R
- E) S

ANS: C

SOL: P is seventh and T is sixth.

TAG: Seating-Arrangement

DIFF: Easy

Q24. What is the position of U from the right end?

- A) Second
- B) Third
- C) Fourth
- D) Fifth
- E) Sixth

ANS: B

SOL: U is fifth from the left in a row of seven, so third from the right.

TAG: Seating-Arrangement

DIFF: Medium

Q25. Which of the following pairs sits at the two extreme ends?

- A) V and P
- B) S and P
- C) V and T
- D) U and P
- E) None of these

ANS: A

SOL: V is first and P is seventh.

TAG: Seating-Arrangement

DIFF: Easy

Q26. In a row of 40 students, Rahul is 12th from the left end. What is his position from the right end?

- A) 28th
- B) 29th
- C) 30th
- D) 27th
- E) None of these

ANS: B

SOL: $40 - 12 + 1 = 29$.

TAG: Order-Ranking

DIFF: Easy

Q27. If '+' means divide, '-' means subtract, 'x' means multiply and 'x' means add, then $16 \div 4 \div 5 -$

3 x 2 = ?

- A) -9
- B) 9
- C) -6
- D) 6
- E) None of these

ANS: A

SOL: The expression becomes $16/4 - 5 \times 3 + 2 = 4 - 15 + 2 = -9$.

TAG: Symbol-Substitution

DIFF: Hard

Q28. Statements: $P > Q \geq R$ and $S < R$. Conclusions: I. $P > S$ II. $Q \geq S$

- A) Only conclusion I follows
- B) Only conclusion II follows
- C) Both conclusions follow
- D) Neither conclusion follows
- E) Either I or II follows

ANS: C

SOL: Combining gives $P > Q \geq R > S$, so both $P > S$ and $Q \geq S$ hold.

TAG: Inequality

DIFF: Medium

Q29. Which word comes third when the following are arranged in dictionary order? Nature, Nation, Native, Natural, Naughty

- A) Nature
- B) Native
- C) Natural
- D) Nation
- E) Naughty

ANS: C

SOL: The order is Nation, Native, Natural, Nature, Naughty.

TAG: Alphabet-Test

DIFF: Medium

Q30. In a certain language MONKEY is coded as XDJMNL. How is CHAIR coded in that language?

- A) QHZGB
- B) QHZGC
- C) BGZHQ
- D) QIZGB
- E) None of these

ANS: A

SOL: Reverse the word and move each letter one step back: CHAIR reversed is RIAHC, which becomes QHZGB.

TAG: Coding-Decoding

DIFF: Hard

#SECTION: ENGLISH

DURATION: 9

#DIRECTIONS: Q31-Q35

Read the following passage carefully and answer the questions given below it.

The rapid expansion of digital payments in India over the past decade has altered the relationship between citizens and formal finance. Where once a bank account was the preserve of the salaried urban household, the combination of low-cost identity verification, a ubiquitous mobile network and a public payments rail has pushed basic financial services into districts that commercial banks had long written off as unviable.

Yet the achievement is more uneven than the headline numbers suggest. Opening an account is not the same as using one, and a substantial share of newly opened accounts record almost no activity beyond the receipt of government transfers. Researchers who have examined this dormancy argue that the binding constraint is no longer access but trust: households that have never had recourse when a transaction fails are reluctant to route their savings through a system they cannot interrogate.

The lesson for policymakers is that infrastructure is necessary but not sufficient. A payments rail can be built in a few years; the institutional habit of using it accrues far more slowly, and depends on grievance redress mechanisms that are visible, cheap and fast. Without them, the digital economy risks reproducing, in a new form, precisely the exclusion it was designed to end.

#ENDDIRECTIONS

Q31. According to the passage, the main reason many newly opened bank accounts remain dormant is:

- A) A shortage of bank branches in rural districts
- B) The absence of trust in a system offering no recourse when transactions fail
- C) High transaction fees charged on small deposits
- D) Poor mobile network coverage in remote areas
- E) A lack of government transfers into those accounts

ANS: B

SOL: The second paragraph states that the binding constraint is no longer access but trust.

TAG: Reading-Comprehension

DIFF: Easy

Q32. The phrase "the preserve of the salaried urban household" most nearly means:

- A) protected by urban households
- B) something restricted to salaried city dwellers
- C) a savings scheme for city workers
- D) an obligation placed on urban families
- E) a record kept by urban banks

ANS: B

SOL: A preserve here means an exclusive domain.

TAG: Vocabulary-In-Context

DIFF: Medium

Q33. Which of the following best captures the author's central argument?

- A) Digital payments have failed in India
- B) Building infrastructure is easier than building the institutional trust needed to use it
- C) Commercial banks should be compelled to open rural branches
- D) Government transfers should be discontinued
- E) Mobile networks are the chief obstacle to financial inclusion

ANS: B

SOL: The final paragraph states that infrastructure is necessary but not sufficient and that the habit of use accrues far more slowly.

TAG: Reading-Comprehension

DIFF: Medium

Q34. The author's attitude towards the expansion of digital payments can best be described as:

- A) Uniformly celebratory
- B) Dismissive and hostile
- C) Appreciative but qualified
- D) Indifferent and detached
- E) Nostalgic

ANS: C

SOL: The author acknowledges the achievement but immediately qualifies it as uneven.

TAG: Tone

DIFF: Medium

Q35. Choose the word most nearly OPPOSITE in meaning to "ubiquitous" as used in the passage.

- A) Widespread
- B) Scarce
- C) Reliable
- D) Modern
- E) Affordable

ANS: B

SOL: Ubiquitous means present everywhere, so scarce is its opposite.

TAG: Antonyms

DIFF: Easy

Q36. Select the part of the sentence that contains an error. Neither the manager (A) nor the employees (B) was present (C) at the meeting (D). No error (E)

- A) A
- B) B
- C) C
- D) D
- E) E

ANS: C

SOL: With neither-nor the verb agrees with the nearer subject, so it should be "were present".

TAG: Subject-Verb-Agreement

DIFF: Medium

Q37. Fill in the blank: She is not only an excellent teacher ____ a gifted administrator.

A) and also

B) but also

C) as well

D) but and

E) however

ANS: B

SOL: The correlative pair is "not only ... but also".

TAG: Conjunctions

DIFF: Easy

Q38. Choose the correctly spelt word.

A) Priviledge

B) Privilege

C) Privelege

D) Privilage

E) Priviledg

ANS: B

SOL: The correct spelling is privilege.

TAG: Spelling

DIFF: Easy

Q39. Choose the word most nearly SIMILAR in meaning to MITIGATE.

A) Aggravate

B) Alleviate

C) Provoke

D) Postpone

E) Complicate

ANS: B

SOL: To mitigate is to make less severe, which is to alleviate.

TAG: Synonyms

DIFF: Easy

Q40. Rearrange the parts to form a meaningful sentence: (P) the report (Q) was submitted (R) by the committee (S) last Friday

A) PQRS

B) QPRS

C) PRQS

D) SPQR

E) RQPS

ANS: A

SOL: The report was submitted by the committee last Friday.

TAG: Sentence-Rearrangement

DIFF: Easy

#SECTION: PK

DURATION: 12

Q41. In a relational database, a superkey that contains no redundant attributes is called a:

A) Foreign key

B) Candidate key

C) Composite key

D) Secondary key

E) None of these

ANS: B

SOL: A candidate key is a minimal superkey, containing no redundant attributes.

TAG: DBMS-Keys

DIFF: Easy

Q42. Which normal form eliminates transitive functional dependency on the primary key?

A) 1NF

B) 2NF

C) 3NF

D) BCNF

E) 4NF

ANS: C

SOL: Third normal form removes transitive dependencies on the primary key.

TAG: DBMS-Normalisation

DIFF: Easy

Q43. The time complexity of searching for an element in a balanced binary search tree containing n nodes is:

A) $O(1)$

B) $O(\log n)$

C) $O(n)$

D) $O(n \log n)$

E) $O(n^2)$

ANS: B

SOL: A balanced BST has height proportional to $\log n$, so search is $O(\log n)$.

TAG: Data-Structures

DIFF: Easy

Q44. Which CPU scheduling algorithm can cause starvation of long processes?

A) First Come First Served

B) Round Robin

C) Shortest Job First

D) FIFO

E) None of these

ANS: C

SOL: Shortest Job First keeps preferring short jobs, so long jobs may never run.

TAG: OS-Scheduling

DIFF: Medium

Q45. In the OSI model, which layer is responsible for end-to-end error recovery and flow control?

A) Network layer

B) Transport layer

C) Session layer

D) Data link layer

E) Presentation layer

ANS: B

SOL: The transport layer provides end-to-end reliability, error recovery and flow control.

TAG: Networking-OSI

DIFF: Easy

Q46. Which of the following is NOT a property of a database transaction?

A) Atomicity

B) Consistency

C) Isolation

D) Durability

E) Redundancy

ANS: E

SOL: The ACID properties are atomicity, consistency, isolation and durability.

TAG: DBMS-Transactions

DIFF: Easy

Q47. The default port number for HTTPS is:

A) 21

B) 25

C) 80

D) 443

E) 8080

ANS: D

SOL: HTTPS uses TCP port 443 by default.

TAG: Networking-Ports

DIFF: Easy

Q48. In a doubly linked list, deleting a node when a pointer to that node is given takes:

A) $O(1)$

B) $O(\log n)$

C) $O(n)$

- D) $O(n \log n)$
- E) $O(n^2)$

ANS: A

SOL: Both neighbours are reachable through the node's own pointers, so the relinking is constant time.

TAG: Data-Structures

DIFF: Medium

Q49. Which SQL clause is used to filter the groups produced by GROUP BY?

- A) WHERE
- B) HAVING
- C) ORDER BY
- D) DISTINCT
- E) LIMIT

ANS: B

SOL: WHERE filters rows before grouping; HAVING filters groups after grouping.

TAG: SQL

DIFF: Easy

Q50. Thrashing in an operating system occurs when:

- A) The CPU is idle waiting for I/O
- B) The system spends more time paging than executing processes
- C) Two processes each hold a resource the other needs
- D) A process never gets CPU time
- E) Memory is fragmented into small blocks

ANS: B

SOL: Thrashing is excessive paging activity that leaves little time for useful work.

TAG: OS-Memory

DIFF: Medium

Q51. Which data structure is used by the runtime to implement recursion?

- A) Queue
- B) Stack
- C) Linked list
- D) Heap
- E) Graph

ANS: B

SOL: Each recursive call pushes an activation record onto the call stack.

TAG: Data-Structures

DIFF: Easy

Q52. In object-oriented programming, the ability of different classes to respond to the same message in different ways is called:

- A) Encapsulation
- B) Inheritance
- C) Polymorphism
- D) Abstraction
- E) Overloading

ANS: C

SOL: Polymorphism lets one interface serve different underlying types.

TAG: OOP

DIFF: Easy

Q53. Which protocol resolves an IP address to a MAC address?

- A) DNS
- B) DHCP
- C) ARP
- D) ICMP
- E) RARP

ANS: C

SOL: The Address Resolution Protocol maps an IP address to a hardware address.

TAG: Networking-Protocols

DIFF: Easy

Q54. The worst-case time complexity of QuickSort is:

- A) $O(n)$
- B) $O(n \log n)$
- C) $O(n^2)$

- D) $O(\log n)$
- E) $O(n^3)$

ANS: C

SOL: When the pivot is consistently the smallest or largest element, QuickSort degrades to $O(n^2)$.

TAG: Algorithms

DIFF: Medium

Q55. In software engineering, the process model that emphasises risk analysis at each iteration is the:

- A) Waterfall model
- B) Spiral model
- C) V-model
- D) Big Bang model
- E) Prototype model

ANS: B

SOL: The spiral model places explicit risk analysis in every cycle.

TAG: Software-Engineering

DIFF: Medium

#ENDTEST
